ARTICLES medium.com/@einancunlu

Hello, I am a self-taught Product Designer with a degree in Computer Science and various coding experience. My passion is designing and I love working on UI & UX.

Understanding the development side of the products helps me a lot while designing and working with the developers in the team.

Besides the other things, I like writing on Medium, traveling the world, going for hiking, working on side projects and contributing to the community.

Some of my articles and Sketch plugins were featured on Sketch, Designer News, Hey Designer and Indie iOS Dev Weekly.

Experience

APR 15 — APR 17 • REMOTE

Product Designer — HelloTalk

HelloTalk is a language learning & exchange app with more than 6 million users worldwide. I worked on the redesign of the interface and the designs for the new features.
